## The Global Turn

Theories, Research Designs, and Methods for Global Studies

EVE DARIAN-SMITH AND PHILIP C. MCCARTY

“Eve Darian-Smith and Phillip McCarty have given us a major new contribution to the study of the global. Among the core elements are negotiating multiple forms of knowledge, decentering the production of global knowledge, and recognizing non-Western epistemologies. This is a must-read.”—Saskia Sassen, author of *Expulsions: Brutality and Complexity in the Global Economy*

“Erudite and accessible, *The Global Turn* offers a masterful delineation of the growing transdisciplinary field of Global Studies. Most importantly, Darian-Smith and McCarty’s pathbreaking presentation of the theories, methods, and training relevant to Global Studies provides both students and scholars with a clear sense of what it means to engage in global research. This is an indispensable guide to a better understanding of the new forms of global interdependence that shape our fast-paced world in the twenty-first century.”—Manfred B. Steger, Professor of Sociology, University of Hawai‘i-Manoa and Honorary Professor of Global Studies, RMIT University (Melbourne)

Deploying interdisciplinary theoretical perspectives that speak to interconnected global dimensions is critical if one’s work is to remain relevant and applicable to the emerging global-scale issues of our time. *The Global Turn* is a guide for students and scholars across all areas of the social sciences and humanities who wish to embark upon global-studies research projects. The authors demonstrate how the global can be studied from a local perspective and vice versa. Global processes manifest at multiple transnational, regional, national, and local levels—interconnected dimensions that are mutually constitutive. This book walks the reader through the steps of thinking like a global scholar in theoretical, methodological, and practical terms, explaining the implications of global perspectives for research design.
